

Carbonin 2017 GSXR-1000 Quick Release Kit Mounting Instructions

Attach Seat Post to
bracket with Supplied
Bolts

Attach bracket to
OEM seat bolt area

Install the Rear flat bottom brackets on subframe then screw on dzus plate

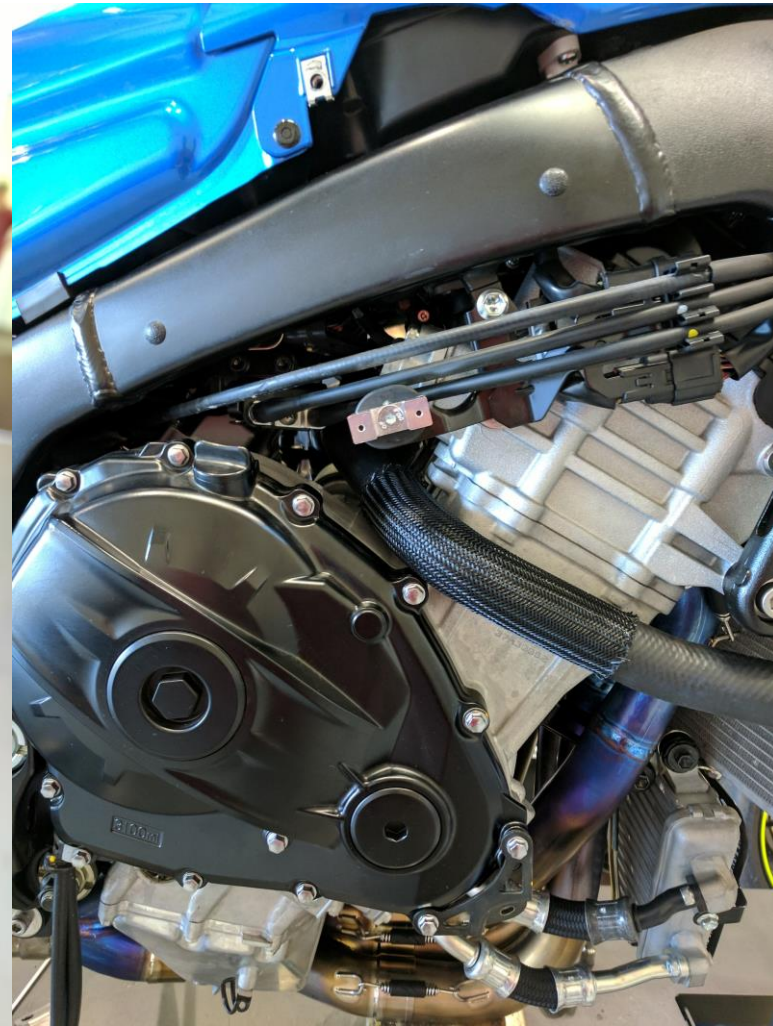

Install CNC brackets to left and right side of subframe (these have a neck to go into the hole) install dzus bracket

Slide over tail unit and use x4 dzus to install
Then fasten seat to the seat pan with provided
locking nuts
Install seat pan using a single dzus in the rear
(note you may have to lift the seat pan at an
angle and put your hand underneath to help
guide dzus) this is tight.
Then use bolts to bolt to seat posts

Install CNC brackets into metal bracket on each side of the bike and use washer and lock nut to secure.
Install dzus plate

Install left bracket using OEM
side stand Bolts

Install Right side bracket to
frame
